

IKIGAI NEUE

A Transhumanist Typeface

INTRODUCING IKIGAI NEUE

A Transhumanist typeface.

Ikigai Neue is the enhanced version of the Ikigai typeface family. It features a regular weight

And an oblique version

The main different between these typefaces is that Neue has tighter kerned glyphs increasing legibility throughout all sizes of the typeface, it is smaller in overall size and everything occupies less space resulting in a darker overall colour of the font and more application

The punctuation has been made bigger too! .,:'-"?!*

Ikigai translates to 'reason of being' in Japanese, it is said that finding your ikigai is the long and deep search of yourself.

12/18 pt +10 tracking.

Transhumanism is a cultural and intellectual movement that believes we can, and should, improve the human condition through the use of advanced technologies. One of the core concepts in transhumanist thinking is life extension. Through genetic engineering, nanotech, cloning, and other emerging technologies, eternal life may soon be possible. Likewise, transhumanists are interested in the ever-increasing number of technologies that can boost our physical, intellectual, and psychological capabilities beyond what humans are naturally capable of.

If every human on Earth stopped dying, overpopulation would trigger a very dramatic socioeconomic disaster.

18/28 pt

Without birth and death, would society and humanity continue to grow and evolve? Or would it stagnate, suffocated by the accumulated ego of intellectuals and demagogues who will not die.

Bb

14/24 pt

We enhance our natural immune systems by getting vaccinations, and we can imagine further enhancements to our bodies that would protect us from disease or help us shape our bodies according to our desires (e.g. by letting us control our bodies metabolic rate). Such enhancements could improve the quality of our lives.
